## **CORDLESS FREEDOM. THE BATTERY SYSTEM FOR YOUR HOME AND GARDEN.**

**At last - no more too short or severed cables.**

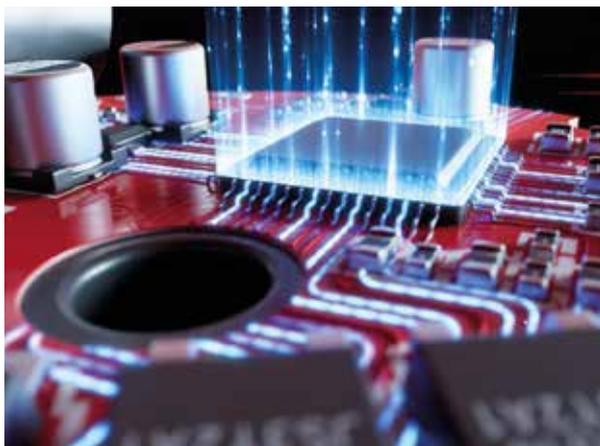

When you have no longer to worry about extension cables that are too short or sufficient sockets. When the device comes to the project instead of the other way round. When you simply insert the battery and are ready to go, whether it is a lawn mower, garden pump, rotary hammer or wet and dry vacuum cleaner. Than that is the feeling of cordless freedom.

## **1 BATTERY FITS ALL TOOLS. FOR DIY ENTHUSIASTS AND HOBBY GARDENERS.**

**Just as versatile as you: Battery power for every situation.**

With more than 300 battery operated DIY and garden tools, Power X-Change is already the broadest battery platform for the ambitious DIYer and amateur gardener. And it's not stopping there! By the year 2027 the battery platform will feature more than 450 tools. What's so special about it is that all products from the Power X Change platform can be operated with just one battery type (18 V).

## POWERFUL MACHINES. LONG-LASTING BATTERIES.

### Battery power for all your projects.

Less power? No way! Our cordless machines offer up to 2700 W of battery power and 8 Ah of capacity, making them easily a match for corded machines! Whether you just want to hang a shelf or drill through a solid concrete wall, with Power X-Change you are equipped to meet any challenge with power and endurance.

## EINHELL PROFESSIONAL. FOR THE HIGHEST DEMANDS.

### Maximum performance now also for professionals.

With its Professional series of cordless tools, Einhell now also offers a high quality line that is equally suitable for demanding jobs in the commercial sector. Top quality standards, a full range of functions and an optimised design now help the professional user as well to achieve maximum performance on his or her assignments!

## LATEST TECHNOLOGY. PROVEN QUALITY.

### For the highest level of safety and performance.

Power X-Change batteries are the core component of our platform. That's why we use only the best components such as high-performance new-generation cells and our intelligent processor-controlled battery electronics. This makes our PXC battery one of the safest in the industry and ensures efficiency, reliability and durability.

## ACTIVE BATTERY MANAGEMENT SYSTEM. INTELLIGENT ELECTRONIC CONTROL SYSTEM.

The computer-assisted Active Battery Management System permanently monitors and controls all the safety-related processes of the electrical components and associated hardware. This results in a whole range of advantages:

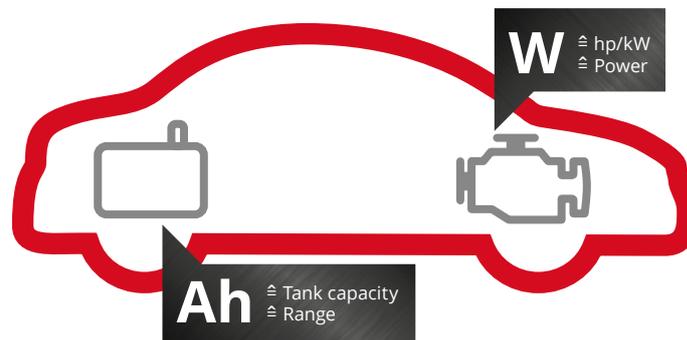

- MAXIMISED RUNNING TIMES
- OPTIMISED TOOL POWER
- LONGER BATTERY SERVICE LIFE
- INCREASED SAFETY

## TWIN-PACK TECHNOLOGY. $18\text{ V} + 18\text{ V} = 36\text{ V}.$

If extra power is required for more power hungry tools, two 18 V battery packs can be simply combined in a single 36 V tool using Einhell's Twin-Pack technology. Doubling the voltage (V) automatically doubles the power (W) as well. Double Twin-Pack technology also lets you work longer without the hassle of having to recharge. In this case four batteries are used. When the power of the first two batteries finally runs out, the system automatically switches over to the two additional batteries.

Rechargeable batteries vary not just in terms of running time and weight. What is also critically important is the power that they provide. If, for example, you want to use your angle grinder for cutting work, the running time (see Ah rating) is generally not critical. Sufficient power, on the other hand, is. A car is a useful comparison. Uphill or when overtaking, more power, in other words more hp respectively kW, is needed.

**PUREPOWER**  
BRUSHLESS

## PUREPOWER – BRUSHLESS DRIVE TECHNOLOGY FOR THE HIGHEST DEMANDS.

Various Power X-Change devices are equipped with brushless motors. They offer significant advantages compared to carbon brush motors:

- MORE POWER
- LONGER RUNNING TIMES
- LONGER SERVICE LIFE
- MORE COMPACT DESIGN
- MAINTENANCE-FREE

### TWIN-PACK

18V + 18V > 36V

TECHNOLOGY

#### TWIN-PACK TECHNOLOGY

If a device needs more power than provided by a single 18 V rechargeable battery, we simply add a second battery so we generate 18 V + 18 V = 36 V.

We call that Twin-Pack Technology. If the voltage (V) gets doubled, the power (W) gets doubled, too.

When you want to hold a garden party and need to keep the robot lawn mower at a distance for the duration of the celebrations.

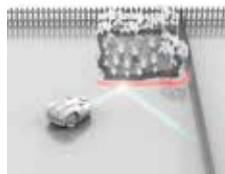

**A NEWLY PLANTED TREE**

A tree has been newly planted in the lawn area and is still sensitive. To protect it from collisions with the robot lawn mower you can use the virtual fence.

**A FLOWER MEADOW IN THE GARTEN**

A flower meadow in the garden is just beginning to grow and is attracting the first insects. Now is the wrong time for the robot lawn mower to pass through.

**LAWN EDGES MADE BETTER**

Lawn edges that are poorly defined or hard to recognise by the robot lawn mower can be upgraded by the magnetic tape for optimum demarcation of the mowing area in the garden.

### TWIN-PACK TECHNOLOGY

If a device needs more power than provided by a single 18 V rechargeable battery, we simply add a second battery so we generate 18 V + 18 V = 36 V. We call that Twin-Pack Technology. If the voltage (V) gets doubled, the power (W) gets doubled, too.

### DOUBLE TWINPAC TECHNOLOGY

Double Twinpack devices have slots for two additional rechargeable batteries. If, for example, two additional batteries are inserted in the GP-CM 36/47 S HW Li lawn mower, such that all four rechargeable battery slots are filled, you can mow double the area without recharging.

Example  
 (GE-CM 36/48 Li M Brushless):  
 Twinpack 2x 18 V = 500 m<sup>2</sup>  
 Double Twinpack  
 2x 18 V + 2x 18 V =  
 500 m<sup>2</sup> + 500 m<sup>2</sup> = 1000 m<sup>2</sup>

## NO CHANCE FOR DUST AND WATER.

Officially tested according to IP57 protection class.\*

### WHAT DOES IP57 MEAN?

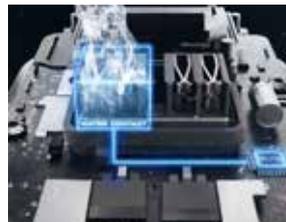

#### DUST 5

Protected from all types of foreign bodies and dust – be it wood, brick or metal.

#### 7 WATER

Protected from high pressure water spray and temporary submersion – to a maximum depth of 1 m for up to 30 minutes.

In addition to the sealed housing there is a sensor controlled safety cut out to prevent short circuiting under water.

After the contacts have been dried, the battery is ready for use again.

\* Protection according to IP57 applies to the battery itself. It does not apply to tools operated with the battery

## IT'S YOUR CHOICE.

### WHAT DOES MULTI-AH MEAN?

Thanks to MULTI-Ah technology, switching over from a 5 Ah battery to a 8 Ah battery is really easy and can be done with just the push of a button. The 5 Ah battery has a 3x longer total service life and is suitable for lighter applications (e.g. cordless lamp or cordless screwdriver). The 8 Ah battery offers them maximum running time for more capacity-intensive applications (e.g. cordless lawn mower or cordless wet and dry vacuum cleaners).

5 Ah > **300%**  
+ more lifetime <sup>1)</sup>

8 Ah > **60%**  
+ more runtime <sup>2)</sup>

<sup>1)</sup> In comparison to every standard lithium-ion battery

<sup>2)</sup> In comparison to the 5 Ah battery

### CLIMATE PROTECTION PROJECTS AT CLIMATEPARTNER

To compensate the CO<sub>2</sub> emissions of our Power X-Change batteries we are supporting climate protection projects in the areas of

sustainable power generation and marine conservation. The compensation covers CO<sub>2</sub> emissions of the battery types 3.0 Ah Plus, 4.0 Ah Plus, 4-6 Ah Multi-Ah Plus and 5-8 Ah Multi-Ah Plus from production to sales.

The climate protection projects selected via ClimatePartner are certified in accordance with international standards such as Verified Carbon Standard (VCS) or Gold Standard (GS) and are regularly checked by independent third-parties. This assures and confirms the climate protection impact of the projects (CO<sub>2</sub> reduction) on a regular basis.

## 4.0 Ah BATTERY – 4.0 Ah PLUS BATTERY. WHERE'S THE DIFFERENCE?

By switching to the new "21700" cell format (21 mm diameter, 70.0 mm length) our latest Power X-Change batteries have acquired the best combination of power/running time and weight.

Why? Using this cell technology it is possible to achieve the same power and running time with five cells instead of the previous ten.

**Benefits? The new batteries are 12 % lighter and 13 % more compact than their predecessors – at 100 % power and running time.**

Results: Light-weight all-rounders for energy-intensive applications such as in cordless chainsaws.
